

PAPER FLOWERS

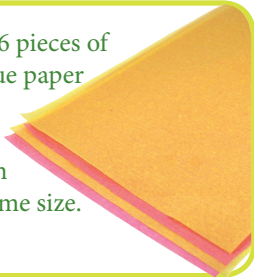

As a good Garden Fairy, you can enjoy Springtime any time of the year by creating your own blooming flower garden out of paper. Use these lost things found in your home to create your own colorful garden of flowers.

Instructions

1 Select 4 -6 pieces of colorful tissue paper and have an adult help you cut them out to the same size.

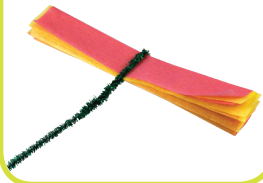

2 Fold your stack of tissue in half.

3 Continue to fold your tissue back and forth like an accordion.

4 Bend your pipe cleaner over the center of the stack twisting the short end around the long end to fasten. This is your stem!

5 Carefully fan out your folded tissue papers on each side of the stem.

6 Gently separate the layers of tissue starting from the top. These are your flower petals!

7 Add an additional pipe cleaner to strengthen the stem and curl the ends to make your flower look like it came right from Pixie Hollow!
